

Finally, the perfect hiding place for your Media Centre PC

Fusion Black, the newest member of Antec's VERIS™ family of Media Components features a clean black finish that perfectly blends with your modern home theatre and stereo equipment. Build your media center with Fusion and you will find that it is so silent and unobtrusive that your friends won't realize you have a computer in your audio/video stack. Comes with a 430 Watt power supply and features an I/R receiver that is compatible with Windows MCE & VISTA™, an LCD display and a volume control knob, giving you full control over all your media in just one case.
