

Trend Line

Cordless keyboard plus cordless mouse using 2.4 GHz radio technology

NTK technology

CyBo@rd Plus

M83-13800 LAA..(1) CB

M83-13800 LBA..(1) CG

Key benefits

- Cordless keyboard plus cordless mouse
- Future-looking 2.4 GHz radio technology
- High interference immunity thanks to choice of 16 channels
- High transmission reliability
- Parallel operation of up to 256 systems (16 channels x 16 IDs)
- Cordless mouse with three keys and scroll wheel for fast navigation
- Symmetrical design of the mouse ensures easy navigation for both right-handed and left-handed users
- Radio receiver for keyboard and mouse with integrated LED status displays
- Transmission range: typ. 5m
- Cordless keyboard with 19 additional keys, freely programmable
- KeyM@n software
- Long service life of the batteries by 2-stage "sleep mode"
- Removable palm rest

Applications

The 19 additional keys can be used to control internet browsers and multimedia applications and to open an email client. This already functions without the KeyM@n software under Windows 2000, Windows ME and Windows XP.

The 2.4 GHz technology allows the operation of several radio devices, e.g. baby phone, cordless telephone, etc. in one room without interference to one another.

Technical specifications

Dimensions (incl. wrist rest):
(L x W x H) 458 x 246 x 40 mm

Weight (incl. wrist rest and batteries):
1,200 g

Temperature range:
Storage temperature:
-20 °C to 60 °C
Operating temperature:
0 °C to 50 °C

Power supply:
- Keyboard: 2.4 V-3.0 V SELV
- Receiver: 5 V SELV
- Mouse: 2.4 V-3.0 V SELV

Current input:
- Keyboard: typ. 5 mA
- Receiver: typ. 80 mA
- Mouse: typ. 10 mA

Keyboard and mouse interface:
PS/2

KeyM@n 2.0

The specially developed KeyM@n software that is included allows all 19 hot keys to be freely programmed. The main focus is on ergonomic design for the user. For example, only few actions are required by the user to assign functions to the hot keys quickly and easily using Drag & Drop or "Send to" from the context menu. Should 19 hot keys not suffice, three further levels of hot keys are available by using the control keys "Ctrl", "Alt" and "Shift". Key assignments can be imported and exported using the "KeyPort" application. This allows to backup key assignments or to exchange them with other users.

Users without CyBo@rd or CyBo@rd Plus can try out KeyM@n with any keyboard. Then the "Scroll"-key can be programmed like a hot key.

Hot keys

7 internet keys with the functions

- back
- forwards
- stop
- update
- search
- favorites
- homepage

3 program keys

- my computer
- calculator
- email

Power Management multimedia keys

- media
- play/pause
- stop
- previous title
- next title
- volume-
- volume+
- mute
- standby

System requirements

- IBM or compatible PC
- PS/2 keyboard interface and PS/2 mouse interface
- CD-ROM drive

Choice of internet browsers:

- Netscape Navigator 4.01 or higher
- Microsoft Internet Explorer 4.01 or higher
